

Concerned about how your dialysis and kidney transplant patients will stay safe and healthy during the next emergency?

Download the app or watch a video by visiting esrdemergencyhub.ipro.org, or use the camera on your smartphone or tablet to scan this code.

INTRODUCING...

The ESRD Emergency Hub

- ✓ FREE resources and tools guide renal patients in creating, storing, and accessing vital health information.
- ✓ During an emergency, sends patients critical alerts in real time, based on their location.
- ✓ Provides easy access to reliable information on open dialysis facilities, sheltering options, transportation services, support organizations, and more.
- ✓ The information your patients need, always at their fingertips on their smartphone or tablet.

Please share this resource with your patients and colleagues to help ensure that the health and safety of this vulnerable population is always protected, especially in times of crisis.

The ESRD Emergency Hub mobile app was developed under a grant from the SC Lowcountry Healthcare Coalition and is managed by the IPRO ESRD Network Program.
